Volaris 101 Reporting Guide

For Org Admins and Portfolio Admins.

Overview

This guide explains how to view learner activity and generate Volaris 101 reports through the **Reporting** section of the Volaris 101 platform.

Reporting is available from the **Reporting** tab in the main navigation bar. It contains three sub-tabs: **Overview**, **User Activity**, **and Reports.** This guide focuses on **User Activity** and **Reports**.

Reporting Access

Administrators can view reporting data for the companies within their assigned portfolio(s).

When first accessing the **Reporting** section, data may be displayed for all companies within an assigned portfolio. Use the available filters to narrow results to the specific VBU or portfolio to be included in a report.

Filtering Results

The same filter bar appears throughout the reporting section. Filters remain applied when switching between **User Activity** and **Reports**.

Most filters apply automatically after a selection is made. The exception is the **Company** filter, which requires clicking **Apply Filter**.

Available Filters

Learner	Search using any part of a learner's name
Domain	Filter learners by email domain
Module	Filter results to a specific Volaris 101 module
Status	Shows learners as Complete, In Progress, and Not Started
Organization	The Organization filter allows you to: • Search for an organization by name • Select or deselect individual organizations • Select all organizations • Navigate between portfolios (Portfolio Admins only)
Date Range	Filter results using the **From Date** and **To Date** fields. Both dates must be selected for the filter to apply

1. User Activity

The **User Activity** tab provides an at-a-glance view of learner progress and completion information. Use this section to quickly search for learners, review completion status, and view module-level details without generating a report.

Understanding User Activity Results

The **User Activity** tab displays the following information:

Name	Learner's full name
Email	Learner's email address
Organization	Learner's organization
Modules Passed	Completed modules shown as "X / Y"
Status	Shows learners as Complete, In Progress, and Not Started
Last Active	Most recent quiz attempt date

Viewing Module-Level Details

Select the **Details** icon to expand a learner record and view module-specific information:

- **Module Name** – Module number and title
- **Score** – Pass, Fail, or In Progress
- **Last Completed** – Most recent completion date and time

Only one learner detail panel can be expanded at a time. The Details icon is disabled for learners with no module history.

2. Generating Reports

The **Reports** tab allows administrators to create downloadable reports for analyzing learner completion and progress.

Report Types

Certification Report	Generates a multi-sheet Excel workbook containing the following: **Analysis Worksheet** A summary view comparing selected organizations, including: • Total learners • Number and percentage of learners who have completed Volaris 101 • Number and percentage of learners currently in progress **Organization worksheets** • One detailed worksheet per organization • Learner-level completion and activity details • Learner status displayed as **Completed, In Progress, or Not Started** **Important:** All selected organizations must belong to the same portfolio. If organizations from multiple portfolios are selected, the report cannot be generated.
Detailed Activity Report	Generates a single-sheet Excel workbook containing all learners matching the selected filters. Use this report when a simple, flat-file export of learner data is required. **Note:** This report contains all past and present learners

Generating a Certification Report

1. Apply the desired filters.
2. Review the **Report Preview**, which will update based on the selected filters.
3. Select **Click to export.**
4. Select **Certification Report.**
5. The report will be generated and downloaded as an **Excel (.xlsx)** file.
6. Open the report in **Excel** to view the **Analysis** worksheet and individual **Organization** worksheets.

Note: If no filters are selected, the report will include all learners within the organizations and portfolios you have access to.

Help & Support

FAQ

How do I request changes to reporting access?

For changes to HR partner assignments, portfolio assignments, or reporting access, please contact lrc@volarisgroup.com

Why can't I see a specific VBU in my reports?

Reporting access is based on your assigned organization or portfolio permissions. If you believe you are missing access to a VBU or portfolio, please contact lrc@volarisgroup.com.

Why am I unable to generate a Certification Report?

Certification Reports can only be generated when all selected organizations belong to the same portfolio. Review your organization filter and ensure all selected organizations belong to the same portfolio before generating the report.

Why do some learners show as completed with 9 of 10 modules completed?

Volaris 101 originally consisted of 9 modules. Learners who completed the program before the 10th module was introduced will continue to show as completed. **These learners can still complete the 10th module at any time.**

Will learners continue to receive completion emails?

No. Completion records can now be viewed directly through the platform, including the **My Learning** dashboard and available reports.
